

OCM Expands Georgia Call Center Operations

FOR IMMEDIATE RELEASE

PARSIPPANY, NJ — June 26, 2008 — One Call Medical, Inc. (OCM), the nation's single largest provider of quality diagnostic management services is pleased to announce the expansion of their Georgia Call Center operations. This facility which was fully integrated into the trio of call center operations back in 2004 has become critical to the recent and future success of One Call Medical's business.

"The Georgia team has consistently delivered high customer satisfaction and quality of service and now provides OCM the capacity and flexibility to respond to both the volume and diversity required by future business expansion" said Don Duford, Chief Operating Officer of One Call Medical. Duford also added that the projection is for this facility to triple in size over the next twelve month period with a focus on customized solutions for local and national clients. In addition to the significant scope of a complex expansion plan, OCM has also integrated the latest data and telephony technology all designed to enhance and expedite the user communication experience. This expansion initiative coupled with the addition of intuitive technology tools further enables One Call Medical to provide the highest levels of service to customers nationally.

About One Call Medical, Inc.

One Call Medical, Inc. ("OCM") is the premier provider of quality diagnostic services through its national network of credentialed providers. OCM offers provider network coverage in all major metropolitan areas for diagnostic radiology (MRI/CT) and EMGs. OCM provides ancillary specialty PPO services, and its customers include the nation's leading healthcare and workers' compensation insurers and third-party administrators, as well as self-insured employers. More information about One Call Medical can be found at www.onecallmedical.com.
