

“How does One Call Medical’s CEU (Continuing Education Unit) program work?”

One Call Medical, Inc. schedules a local presentation for claims adjusters and nurse case managers to discuss diagnostic imaging as it relates to worker’s compensation injuries. Listed below are the current radiology topics we have designed presentations for.

- What Claims People Need to Know about MRI/CT
- Nomenclature and Classification of Lumbar Disc Pathology
- Overview of Imaging Modalities
- Imaging of Back Pain
- Imaging of Joints
- Radiology for Worker’s Comp

“What should I expect?”

Certain states require that each presenter be approved by the state. Once it’s determined that you are interested in doing a local presentation, you will receive a “Welcome to the CEU Program” packet containing all necessary paperwork, including:

- Consultant Agreement
- Confidentiality Agreement
- Color copy of the presentation, a CD of the presentation and the course outline
- State paperwork (where applicable)

“What are the benefits of presenting?”

The presenter has the opportunity to:

- Share knowledge to help the audience better understand diagnostic testing and imaging
- Strengthen the relationship between One Call Medical, Inc. and the imaging center
- Provide exposure for both the center and One Call Medical, Inc.
- All presenters are compensated for their time and participation

We hope we have answered any questions you might have regarding our CEU program. If not, feel free to contact Liz Chastney, CEU Coordinator, who will be happy to provide any additional info. Thank you and we look forward to working with you!
